Assignment 2

Develop a Business Idea and a one page-Business Plan

Women Entrepreneurs Network – Business Idea

Women Entrepreneurs Network (WEN) is a community-driven platform designed to solve the problem of isolation, limited access to mentorship, and lack of resources faced by women starting or growing a business. The idea is to create a supportive digital ecosystem where women entrepreneurs, aspiring founders, freelancers, and home-based business owners can connect with mentors, industry experts, investors, and one another, gaining access to guidance, funding opportunities, and a trustworthy community that helps them build sustainable, successful businesses.

The platform will operate through a website and mobile application, supported by social media, WhatsApp/Telegram communities, networking events, and workshops. WEN can generate revenue through membership fees, paid workshops and courses, premium mentorship programs, corporate sponsorships, commissions on business services, and advertisements. Its main customers will be women entrepreneurs at every stage of their journey, while mentors, financial institutions, and corporate partners will serve as key collaborators.

The long-term vision is to make WEN the leading network that empowers women to start, grow, and succeed in business together, giving every woman entrepreneur access to mentorship, capital, and community regardless of her location or background — under the motto “Empowered Women, Empower Women.”

Business Plan

1. Executive Summary:

WEN is a community and mentorship platform built to connect, support, and empower women entrepreneurs, bringing mentorship, resources, networking, and funding access into a single platform.

2. Mission Statement:

"To connect, support, and empower women entrepreneurs by providing mentorship, resources, networking, and opportunities to grow and succeed together."

3. Operations:

Woman joins → Connects with mentors/peers → Learns via workshops → Grows business with guidance → Succeeds with community → Mentors newer members.

4. Company Background:

WEN is a proposed community-tech startup solving isolation and limited support faced by women in business, connecting them with mentors, resources, and each other.

5. Product Description:

Mentorship and guidance; knowledge and resource access; funding/investment opportunities; a platform to showcase businesses; networking events and workshops; skill-building programs; mobile and web access.

6. Marketing Plan:

Targets women starting or running businesses, freelancers, and home-based owners. Reaches them via website, app, social media, WhatsApp/Telegram, events, and referrals. Message: "Empowered Women, Empower Women."

7. SWOT Analysis:

Strengths: Trust-based community, women-focused model, verified mentors, easy digital access.

Weakness: Building mentor base, requires moderation, initial trust-building, sustaining engagement.

Opportunities: Growing women-led entrepreneurship, govt. scheme partnerships (MSME, Startup India), CSR tie-ups, regional expansion.

Threats: Competing networking platforms, mentor availability, data privacy concerns, funding sustainability.

8. Financial Planning:

Revenue via membership fees, paid workshops, premium mentorship, sponsorships, and commissions. Major costs: platform development, event organization, marketing, mentor fees, and operations.

9. Competitor Analysis:

Competes with general networking platforms, business incubators, and NGOs, but WEN is a dedicated, end-to-end ecosystem exclusively for women entrepreneurs.
