ASSIGNMENT 5

FINANCIAL MODEL AND COST ESTIMATION

Women Entrepreneurs Network (WEN)

The Women Entrepreneurs Network (WEN) is a proposed student-developed digital platform that connects women entrepreneurs with mentors, experts, investors, business resources and other entrepreneurs. This financial model estimates the startup investment, operating cost, expected revenue, cash flow, profit and break-even point for the first year.

1. Business Assumptions

Particular	**Assumed Value**
Type of business	Student-developed digital platform
Initial investment	₹30,000
Annual membership fee	₹2,388
Monthly membership equivalent	₹199
Variable cost per member/year	₹120
Expected first-year members	100

2. Sales Forecast

The first-year sales forecast is based on 100 paid members. Each member pays an annual membership fee of ₹2,388, equivalent to ₹199 per month.

Particular	**Value**
Expected members	100
Annual membership fee/member	₹2,388
Expected annual sales revenue	₹2,38,800

Calculation: Sales Revenue = Number of Members × Annual Membership Fee

= 100 × ₹2,388 = **₹2,38,800**

3. Startup / Fixed Cost Estimation

Expense	**Amount**
Domain registration	₹1,500
Hosting/server expenses	₹5,000
Database and cloud storage	₹3,000
UI/UX and design tools	₹3,000

Testing and internet expenses	₹5,000
Documentation and presentation	₹3,000
Promotion and awareness	₹5,000
Miscellaneous expenses	₹4,500
Total fixed/initial cost	**30,000**

The fixed/initial cost represents the estimated amount required to establish and operate the student-developed prototype during the planning period. The largest listed expenses are hosting/server, testing and internet, promotion, and miscellaneous expenses.
